

BOX PROFILE 34/1000

Rooflight sheet

Translucent lightweight GRP roofing sheets that let in diffused daylight at an 80% transmission rate. With a width and profile to match that of our Box Profile 34/1000 sheet, these GRP rooflights offer natural daylight into your project. At 1.5mm thick, these GRP roofing sheets are heavy duty and hard-wearing. A resin enriched gel coat finish protects against the effects of any UV radiation and gives a strong life expectancy of in excess of 15 years.

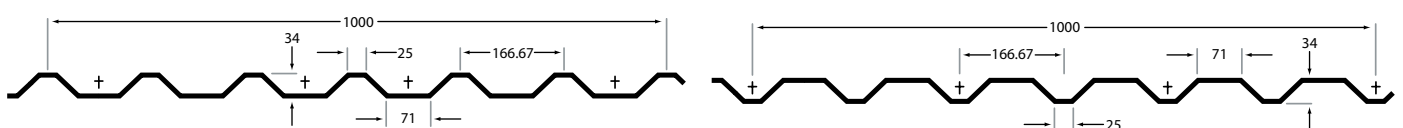

Uses for 34/1000 Profile Fiberglass Sheets for Roofing:

Perfect for industrial, commercial domestic and agricultural application, plus anywhere that maximum light penetration is required. If rooflights are between metal sheets, remember to overlap the sheets by 250mm over a purlin. Please note, it is recommended you should not have more than 2 rooflights side by side before a metal sheet is used. This will help keep the roof as strong as possible.

GRP Rooflight Benefits:

- Natural daylight with weather protection
- Long maintenance-free life
- GRP Sheets will withstand high winds and hailstones
- Stocked in lengths of 2.5m, 3m, 3.5m, 4m, 4.5m, 5m.
- Lightweight GRP roofing sheets, yet still hard-wearing
- GRP sheets offer sun protection against damaging ultraviolet sun rays
- Independently tested to current CE EN 14782 requirements
- Gel coat protects the GRP sheet to give a long life
- Ideal for plant growing

SPECIFICATIONS
