

# CORRUGATED 13/3 Rooflight sheet

These corrugated GRP translucent roof sheets are made from translucent heavy duty 1.5mm thick GRP and will let in daylight at a transmission rate of over 80%. The width and profile will match that of our Corrugated Profile 13/3 metal sheets so you can be sure that these translucent roof panels will match perfectly. GRP translucent roof sheets are available in lengths of 2.5m, 3m and 3.5m.

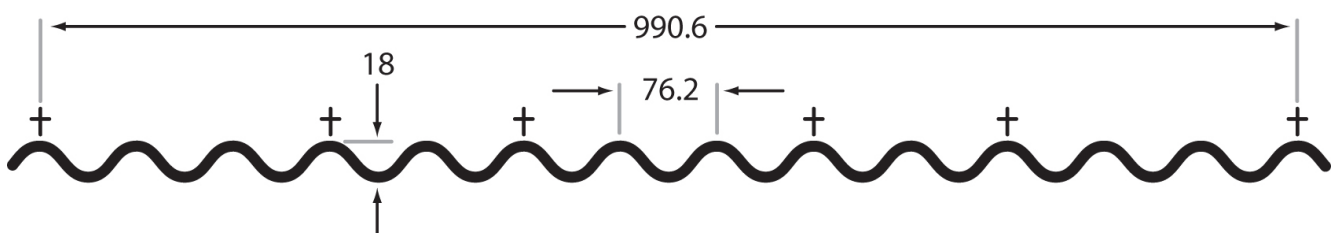

## Uses for 13/3 GRP Translucent Roof Sheets:

GRP Rooflights can be incorporated into the roof design, these can be placed in different areas of the roof where light is required. If rooflights are between metal sheets, remember to overlap the sheets by 250mm over a purlin. Please note, it is recommended you should not have more than 2 rooflights side by side before a metal sheet is used. This will help keep the roof as strong as possible.

## The Benefits of 13/3 Translucent Roof Panels:

- Natural daylight with weather protection
- Long maintenance-free life
- GRP translucent roof sheets will withstand high winds and hailstones
- Stocked in lengths of 2.5m, 3m and 3.5m
- Lightweight yet still hard-wearing
- Translucent roof panels are fast and easy to fit and can be fixed and cut with simple tools
- Offers sun protection against damaging ultraviolet sun rays
