

# Flat Sheets

## PVC Plastisol 0.7mm

Cladco Flat Sheets can be used in a variety of ways from lining the bottom of a trailer bed to making your own custom flashings. Flat PVC Roofing Sheets have multi-layer coatings, designed to provide excellent corrosion resistance and climatic protection.

PVC Plastisol Coated Sheets provide scratch resistance with a tough leather grain finish, with a 200 micron thick coating that provides typically 15 to 25 years to first maintenance or repaint, with a life in excess of 40 years in normal environments..

Cladco Galvanised Roofing Sheets, thanks to their natural reactive protection against corrosion and rust, are ideal for most Roofing projects. The high-quality and durable material of Cladco Galvanised Roofing Sheets should protect your project from the elements and any staining, rust, or corrosion.

| SPECIFICATIONS |                     |
