

Flat Sheets

Polyester Paint 0.7mm

Cladco Flat Sheets can be used in a variety of ways from lining the bottom of a trailer bed to making your own custom flashings. Made from high-quality roofing material and incorporating multi-layer coatings to provide excellent corrosion and climatic protection with a moderate resistance to scratching.

A 25 micron thick, smooth enamel coating that is economic to use and gives excellent weather resistance, typically 8 to 12 years to first maintenance or repaint, with a life in excess of 20 years in normal environments.

Galvanised Steel is the ideal material for Cladco Profiles Roofing Sheets, thanks to the excellent resistant properties against wind, heat, rain and snow, as well as rust, staining and corrosion. Galvanised Steel should not rust or corrode thanks to its reactive protective elements, guarding itself against natural breakdown by forming a passive corrosion product layer.

SPECIFICATIONS	
Material	Galvanised Steel
Thickness	0.7mm
Finish	Polyester Paint
Size	3m x 1240mm approx.

COLOURS

Black

White

Light Grey

Juniper Green
