

TILE FORM 41/1000

Mica

Often referred to as tile effect roofing sheets, these Tile form roof tile sheets are designed to look like an authentic pan tile roof. Our Tile form metal sheets really do give the appearance of traditional clay tiles. Using 0.6mm galvanised Swedish Steel, they are formed and then given an extremely tough and hard-wearing Mica coat on the external face. With its profile height of 41mm, each pantile roof sheets cover a width of 1,000mm when installed and is available in either Copper Brown or Graphite Grey.

Uses of Roof Tile Sheets:

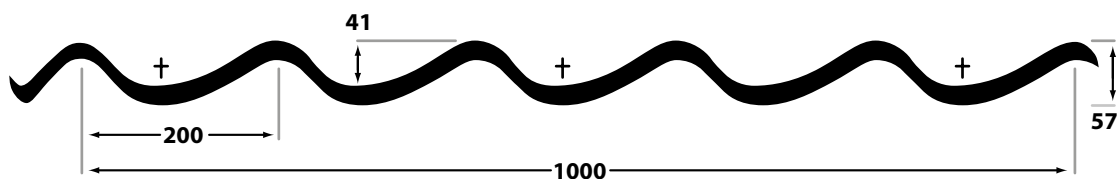

Available for use as single skin tile form on domestic, industrial, commercial and agricultural buildings. These tile effect roofing sheets can be used as single skin tile form sheeting, to over clad an existing roof or an external face of a built-up insulated system. Suitable for roof pitches of 12 degrees or higher.

Roof Sheets That Look Like Tiles - The Benefits

Traditional roof appearance with the benefits of modern coated steel tile sheets. Strong yet lightweight roof tile sheets with a durable surface. This desirable steel roof tile sheets blend well into older, culturally sensitive areas and can also give a fresh new look to new buildings.

Cladco Profiles tile sheets use Greencoat colour coated steel, an eco-friendly long-lasting material which is far superior to other materials, meaning your new roof will last much longer.
