

Z Purlins 175mm

Cladco Profiles manufacture metal Z Purlins/sheeting for supporting either roof sheets or vertical wall cladding. Z Purlins are 175mm and our production system enables the accurate manufacture of metal Z purlins to lengths of up to 9m.

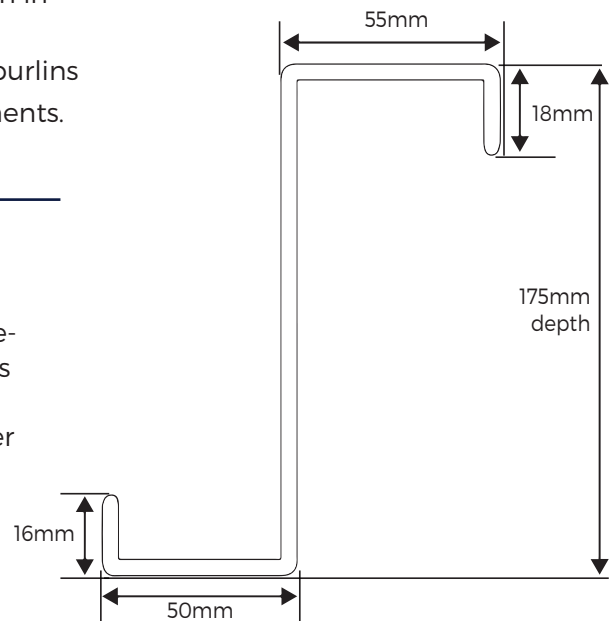

Our sections are designed to BS EN 1993-1-3:2006 using analysis and testing and satisfy the requirements of BS5950: Part 5 (1998). Cladco supply sleeves for joining metal Z purlins together, as well as weld or bolt on cleats for joining metal Z purlins to rafters.

Benefits of using Cladco Metal Z Purlins:

- Manufactured to exact length by Cladco
- Made from structural grade Z39 galvanized steel, 1.8mm in thickness for maximum strength and long life
- Lighter, stronger and cheaper than equivalent timber purlins
- Independently tested to current CE EN 14782 requirements.

Metal Z Purlins for Roofing

Our metal Z purlins can be produced for sleeved, double-span sleeved, butted and overlapped purlin systems. This traditional, well-proven system of sheet support offers a high degree of strength, flexibility and weight saving over timber or hot rolled steel sections with ease of handling on-site and during installation.

SPECIFICATIONS	
Length	1.5 to 9.0 metres
Thickness	1.8mm
Depth	175mm

PLEASE NOTE – Extra care should always be taken when handling metal sheets and flashings we advise using the correct type of Glove when handling or moving metal sheets and flashings.
