Drawing not to scale

Compatible With A
Range Of Screws

Made From
Strong Stainless
Steel

Simple To Use

MATERIALS

Made from stainless steel, this tool is long-lasting and once purchased, can be used multiple times on relevant roofing projects.

DURABILITY

This driver tool is designed to be durable with the ability to withstand a high torque, ensuring that a proper installation is achieved with each screw.

ACCESSORIES

The 11mm socket is compatible with our full range of roofing moulded head screws, with the coloured hex head cap of the four types of screw fitting to the driver.

EASY TO USE

The driver tool is simple and easy to handle and use alongside moulded head screws to streamline the overall roofing installation process.

PERFORMANCE

Using this tool will improve the performance of the screws, creating a water-tight finish to ensure that your roofing sheets or flashings avoid water ingress.
