

Choice of Coatings: Galvanised

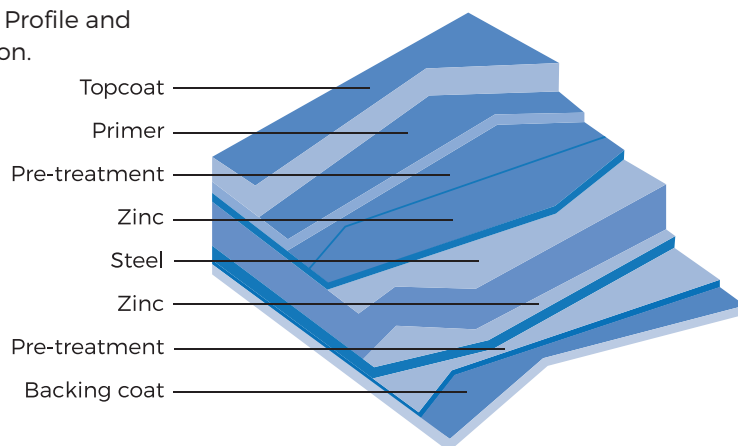

The coated steel strip we form into Roofing Sheet Profiles and Flashings is produced by leading suppliers including Heijling Zonda, Tata, SSAB, and Eurosteel, giving us control over quality and traceability of the material we use.

To produce high-quality, pre-coated sheeting, a system of multi-layered coatings are applied to a zinc coated, high-tensile steel strip and oven-cured to ensure optimum adhesion. This provides Roofing Sheets with excellent corrosion resistance and climatic protection, together with abrasion resistance and high strength. We provide an extensive range of colours, where choice and aesthetic appeal can be matched to environmental and performance requirements.

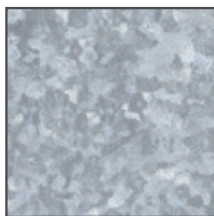

Dripstop anti-condensation membrane is available on Box Profile and Corrugated Profiles. Please contact us for further information.

Please note: Colours are for guidance purposes only, actual colour may vary from image supplied. If you would like to see the physical colour before purchasing, please contact us for a swatch sample.

GALVANISED COATED

We manufacture Galvanised coated sheeting in:

34/1000 Box Profile, which features a 34mm deep profile providing a 1000mm cover width, which can be used at a minimum roof pitch of 4°.

32/1000 Box Profile with a 32mm deep profile, which gives 1000mm cover width and can be used at a minimum roof pitch of 4°.

3/13 Corrugated Profile of 13 corrugations of 3 inches giving 990mm width cover which can be used at a minimum roof pitch of 10°.

TOLERANCES

All dimensions are subject to roll forming tolerances.

THICKNESS

Galvanised sheeting is available in 0.5mm and 0.7mm thicknesses.

COLOUR

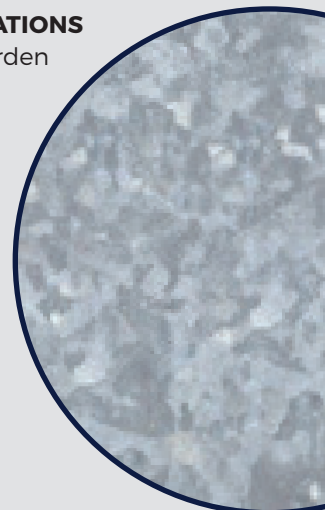

Galvanised only.

STORAGE & HANDLING

For advice on storage and handling, please consult the Installation section on our website.

TYPICAL APPLICATIONS

Sheds, stables, garden rooms, homes, building projects, side cladding, partitioning, and many more applications.
