

# Choice of Coatings: Prelaq Mica

The thickness of the Prelaq Mica coating is optimized wear and weather resistance in normal conditions. Prelaq Mica possesses excellent colour retention and also provides protection against corrosion.

To produce high-quality, pre-coated sheeting, a system of multi-layered coatings are applied to a zinc coated, high-tensile steel strip and oven-cured to ensure optimum adhesion. This produces a Roofing Sheet with excellent corrosion resistance and climatic protection, together with abrasion resistance and high strength. We provide an extensive range of colours, where choice and aesthetic appeal can be matched to environmental and performance requirements.

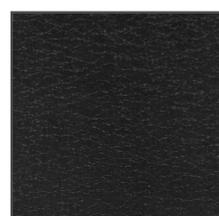

## Prelaq Mica Chart

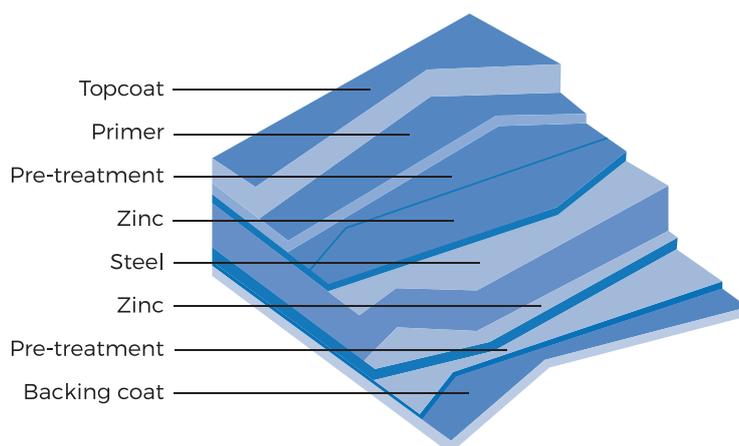

Copper Brown  
BSO4C39

Graphite Grey  
RAL7016

Black  
RAL9005

Prelaq Mica coating is available in either Black, Graphite Grey or Copper Brown colour.

Please note: Colours are for guidance purposes only, actual colour may vary from image supplied. Numbers represent nearest BS/RAL reference. If you would like to see the physical colour before purchasing, please contact us for a swatch sample.

### PRELAQ MICA COATED

Prelaq Mica coating is only available in the Tile Form sheeting Profile. If you would like this finish on another Profile, please contact us on 01837 659901.

### QUALITY ASSURANCE

Prelaq Mica product is manufactured according to the BT patent (Bio-based Technology) and holds a high environmental position. In BT coating, a substantial portion of the traditional fossil oil is replaced by Swedish rapeseed oil, which is unique on the market. SSAB holds a worldwide patent for this coating technology.

### TYPICAL APPLICATIONS

The traditional appearance of this pantile effect Roofing Sheet makes it perfect for sheds, garages, extensions and more.

### COLOURS

Prelaq Mica coating is available in three colours: Black, Graphite Grey and Copper Brown.

### HIGH RESISTANCE

Prelaq Mica Sheets have high colour retention and a long-lasting finish that resists rust, white rust and UV radiation, as well as scratches and the build-up of dirt for reduced maintenance.

### THICKNESS

Prelaq Mica coating is available in 0.6mm thickness.

### STORAGE & HANDLING

For advice on storage and handling, please consult the Installation section on our website.
