CLADCO PROFILES®

Smooth Finish

Environmentally Friendly

Comprehensive System

Quick To Install Using Adhesive

MATERIALS

Made from hard-wearing plastic, the caps protect the otherwise exposed edge of the decking boards.

SURFACE

Featuring a smooth marbled-effect surface for a neat finish to your decking boards.

ACCESSORIES

These end caps are compatible with our Signature hollow composite decking boards to complete installation.

LOW MAINTENANCE

These caps have a smooth surface that is simple and easy to wipe down, when necessary.

LONG LASTING

Cladco composite end caps are a long lasting addition to your decking project.

INSTALLATION ADVICE

Once the Signature boards have been positioned and installed, end caps can be used to complete the decking.

It is recommended to lightly sand the edge of both the edge of the board and the end cap to create sufficient friction. This will make the caps more secure once slotted in place.

For increased security, Cladco adhesive can be used. This will help to fix the caps more solidly in the edges of the boards.
