

2M COMPOSITE FENCE POST SPACER

PROFENCE RANGE

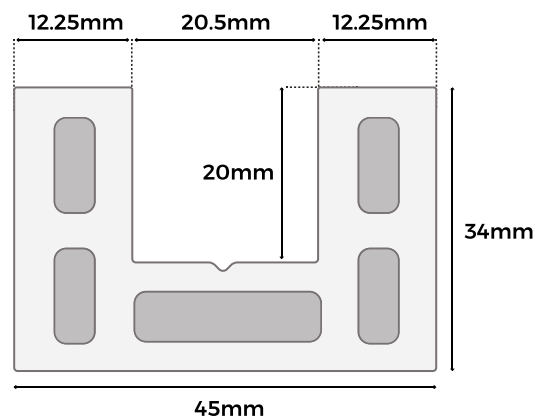

This 2m-long composite spacer is designed specifically for Cladco's ProFence composite fencing panel installations. Measuring 45mm x 34mm, it enables your ProFence boards to sit securely within existing concrete posts. Manufactured as part of the Cladco ProFence range, this product offers a simple and effective solution for adapting concrete posts to work with modern composite fencing systems.

Solution

Simple Installation

Creates A
Secure Fit

Engineered Specifically
For Cladco ProFence
Composite Fencing

MATERIALS

Manufactured from durable composite material for reliable, long-term outdoor performance.

EASY TO USE

Simply slots into existing concrete posts to secure Cladco ProFence composite fencing panels.

INSTALLATION

Slots easily into standard concrete posts and should be screwed into place to securely hold Cladco ProFence fencing panels.

LOW MAINTENANCE

Composite construction and rust-resistant design ensure minimal upkeep once installed.

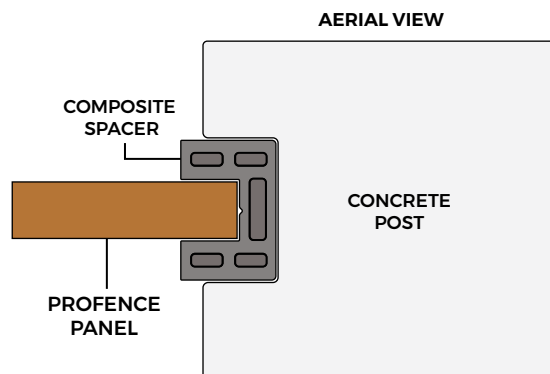

LONG LASTING

Provides a secure, professional fit designed to support the durability of your ProFence fencing system.

INSTALLATION ADVICE

- Position the spacer vertically inside the concrete post slot.
- Secure the spacer to the inner face of the post using the narrow V-groove as the screw line.
- If trimming is required, cut the spacer with a circular or table saw fitted with a diamond-tipped blade (the same method used for composite joists).
- Once fixed in place, spacers will remain visible, so ensure they are aligned and flush to achieve a clean, professional finish.
