

2M COMPOSITE FENCE POST SPACER

PROFENCE AND
SIGNATURE RANGE

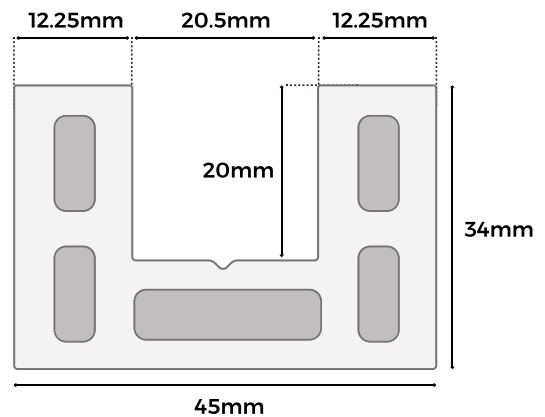

This 2m-long composite spacer is designed specifically for Cladco's ProFence and Signature composite fencing panel installations. Measuring 45mm x 34mm, it enables your ProFence or Signature boards to sit securely within existing concrete posts, offering a strong, professional finish without the need to replace your current boundary setup.

Solution

Simple Installation

Creates A
Secure Fit

Engineered Specifically
For Cladco ProFence
and Signature
Composite Fencing

MATERIALS

Manufactured from durable composite material for reliable, long-term outdoor performance.

EASY TO USE

This spacer easily slots into standard concrete posts to secure our ProFence and Signature Fencing Panels.

INSTALLATION

Complete your Cladco ProFence and Signature Fencing ranges with the corresponding panels and rails.

LOW MAINTENANCE

Composite construction and rust-resistant design ensure minimal upkeep once installed.

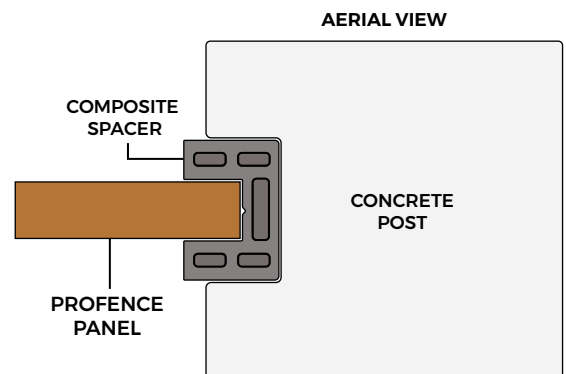

LONG LASTING

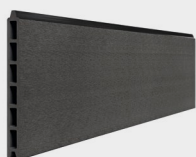

These trims are designed to increase the longevity of your ProFence or Signature composite fencing panels by ensuring a secure fit.

INSTALLATION ADVICE

- Position the spacer vertically inside the concrete post slot.
- Secure the spacer to the inner face of the post using the narrow V-groove as the screw line.
- If trimming is required, cut the spacer with a circular or table saw fitted with a diamond-tipped blade (the same method used for composite joists).
- Once fixed in place, spacers will remain visible, so ensure they are aligned and flush to achieve a clean, professional finish.
