

FIXINGS KIT

FIBRE CEMENT CLICK RANGE

This fixing kit is essential for installing your fibre cement click cladding boards, regardless of whether you decide on a smooth or woodgrain finish. The hidden clips slot the boards together seamlessly while the included screws secure them firmly in place, ensuring a professional installation every time.

MANUFACTURED FROM
STRONG STAINLESS STEEL

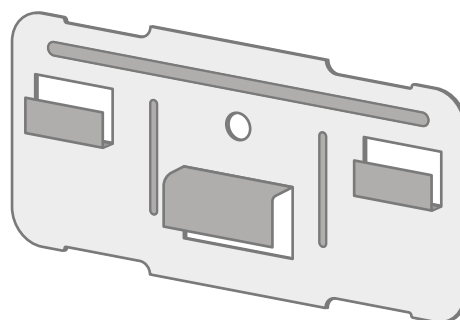

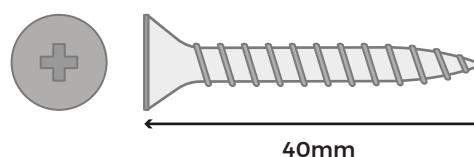

ESSENTIAL FOR SECURING CLADCO
FIBRE CEMENT CLICK BOARDS

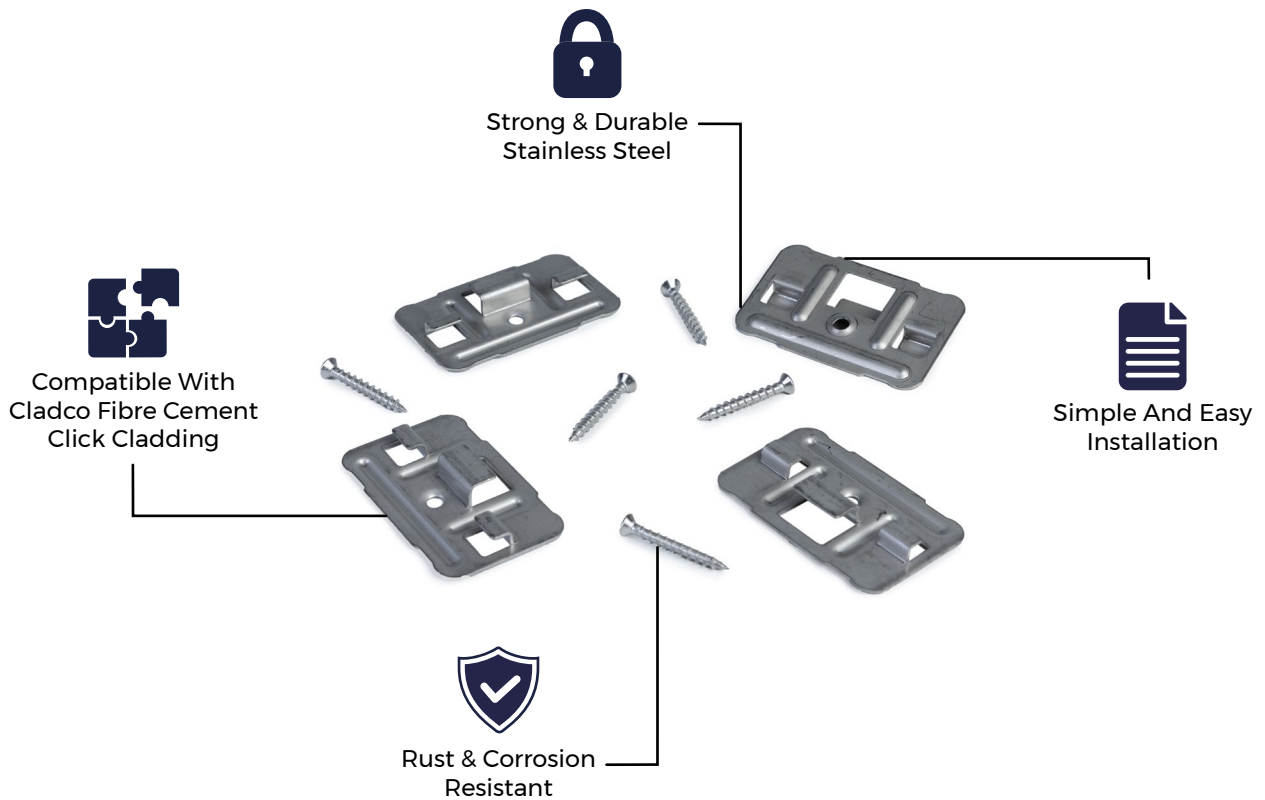

RUST AND CORROSION RESISTANT

Material	Stainless Steel
Pack Size	100 Clips & 100 Screws

Please Note: Images are for illustration purposes only. Actual products may vary slightly from those shown.

MATERIALS

Both the fixings and the screws are manufactured from durable stainless steel, ensuring a secure, long-lasting fix.

DURABILITY

Cladco stainless steel clips and screws are resistant to rust and corrosion, making them ideal for withstanding various types of weather conditions.

ACCESSORIES

These clips and fixing screws are compatible with our fibre cement click cladding range.

INSTALLATION

Cladco stainless steel clips and screws are quick and easy to fix, making them ideal for hassle-free cladding installations.

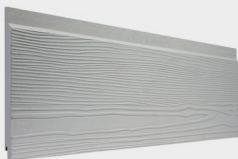

EASY TO USE

Installation guidelines recommend using nine pieces per 3.6 metre panel. The M4x30 steel fasteners should then be used to secure them as well as the boards themselves.

Please Note: These fixings are for installing our fibre cement click cladding. We do not recommend using them on fibre cement lap installations.
